Subject: Teledyne Controls' West Los Angeles Facility is moving to El Segundo, CA

Dear Valued Customer,

We are pleased to inform you that Teledyne Controls is relocating its Headquarters, Manufacturing Facility and Repair Station from West Los Angeles, California, to an upgraded high-tech facility in El Segundo, California. The new facility is located less than fifteen miles away from our current location and conveniently situated close to the Los Angeles International Airport. Please be assured that this move will not affect our continued business operations and quality of service.

This letter is to provide formal advance notification so you can ensure that appropriate arrangements are made at your company.

Please distribute this information to your Quality Assurance, Purchasing, Shipping, and all other appropriate Departments within your company.

Move Details:

Move Date: **August 10, 2007.**

Our move will start on August 10, 2007 and the entire facility relocation will be **completed by August 19, 2007.**

However, our Shipping & Receiving Department will be open at the new El Segundo facility **from August 6.** Even though shipments arriving in West Los Angeles will be re-directed to El Segundo, we invite you to start sending all equipment to our new address as of August 6, 2007.

The new facility address is:

Physical Delivery Address

Teledyne Controls
501 Continental Boulevard
El Segundo, CA 90245

Mailing Address:

Teledyne Controls
P.O. Box 1026
El Segundo, CA 90245-1026

Advance Move Planning:

To ensure that this move is as transparent to our customers as possible, Teledyne Controls has built up an inventory of product safety stock that can be provided during the move transition period.

Quality Management System and Regulatory Approvals:

This move only involves the physical location of the facility.

All existing AS9100 and ISO 9001 Quality Management System Processes, including those currently FAA approved, as well as all other Manufacturing, Inspection, and Test processes, fixtures, tooling, test sets, etc. will be re-located to the new facility, intact and without change.

The processes at the new facility will be validated to ensure that they continue to yield fully compliant products.

We have coordinated this move with our Third Party Registrar, Det Norske Veritas, to ensure that our system will remain approved to AS9100 / ISO 9001 after the relocation.

Advance planning sessions with the Regulatory Agencies have been held to ensure that our existing FAA, EASA, and CAAC approvals are re-established at the new facility in the shortest time possible.

Continued Approval by Your Company after the move:

After the move, Teledyne Controls' Quality Department welcomes all customers to visit our new facility and perform Quality audits and surveys to ensure that Teledyne remains an approved supplier for your company.

Please contact the Teledyne Controls Quality Department to make arrangements for an on-site visit.

Move Contact information:

Phone and Fax Numbers: In an effort to minimize confusion, the following current Teledyne Controls telephone and fax numbers will remain *unchanged until January 15, 2008*:

STAR Line	1-888-246-7827
AOG Hotline	1-310-207-6086
