

Control your Loadable Software Parts!
Eliminate Floppy Disks!

LoadStar® TV is a Windows program that performs the following functions:

- Transfers loadable software parts from floppy disks or the Internet into the mass storage memory of portable data loaders.
- Operates on any office computer operating Windows 2000.
- Links to the PDL-615/MSD and the PMAT 2000 via a high speed Ethernet interface.
- Organizes loadable software parts by aircraft type, airplane tail number, and customer part numbers.
- Enables maintenance mechanics to view, load, verify, and delete loadable software parts on PDL-615/MSD and PMAT 2000.

LoadStar[®] TV

LoadStar[®]

Terminal Version

- Store Loadable Software inside the PDL-615/MSD
- Save Time Data Loading
- Eliminate Floppy Discs
- Manage the loadable software parts configuration of each airplane.

It is this simple

1. PDL 30100 Rev C MSD
- 2, 4 Test Connector with power cable P/N 31521-1, 50-400 HZ 115 VAC
3. Ethernet Adapter P/N 32065-2 (RJ45)
5. Desktop computer running Windows environment with a dedicated 10 BaseT network interface card.
